Mrs. Schilke:

While I disagree about this being the 3rd request of me [all other requests have arrived here only as a copy of a request you sent directly to Ms. Pfeiffer at US EPA], I will make some contacts to try and find the information you are requesting, since this is the first request directed to me. I make no promises, as the North Dakota Department of Health does not have regulatory authority over oilfield workover jobs, until and unless there are material releases from those jobs that adversely impact, or potentially impact, public health, or waters of the state of North Dakota, or waters of the United States. And even then, our authority lies only in learning what was released and how it is going to be removed, human health protected, the environment restored, and seeing it is accomplished in a timely manner.

Subject: 3rd request

This is the 3rd request I have made for chemical information used on the Anvers & Ellis/Somerset workover jobs done in June & July 2012. I have gotten no response from anyone. Does Kris Roberts still work for the ND Health Dept, if not who should I contact? Is this the correct email address, I have sent several emails to him with no response about problems we have had with the water since these jobs took place. Have these emails been received?
